

## Briefing Paper Non-Rule Policy Document Revision

### Non-Rule Policy Document Title:

Risk Integrated System of Closure (RISC) - Technical Guide and User-s Guide

### Brief Description of Non-Rule Policy Document:

Chapter 2 of the RISC User Guide, titled RCRA Closure and Corrective Action Program, has been revised relating to industrial closure requirements.

### Description of Need for Policy:

The 2001 Legislature amended the Environmental Statute to include the use of a restrictive covenant (property deed restriction) at closed sites (see IC 13-14-2-6). The restrictive covenant language provides a mechanism to assure that contaminated sites closed to industrial exposure standards are not later changed to residential use, unless remediation to residential exposure levels is achieved.

The revisions were developed in consultation with representatives of the RCRA regulated community, and are represented in ~~strikeout~~ and ***bold italic*** in the attached document.

### Required Action from Public:

There are no Arequired actions@ imposed upon the regulated community by this revision. The revision streamlines the process for obtaining an industrial closure certification at RCRA regulated facilities.

### Other Comments or Issues:

Revisions unrelated to industrial closure were limited to clarifications of definitions.

*This briefing paper is to be filled out by the Assistant Commissioner of the program when the NPD is ready for final signature by the Deputy Commissioner, Chief Counsel, and Commissioner. This form must accompany the NPD for Commissioner's signature.*
